

Futar[®] D Occlusion

It's The Hardest Thing We've Ever Done.

From the moment you try it, you'll see that Futar D performs like nothing else on the market. Upon application, Futar D provides a smooth, mousse-like consistency. In just seconds, it's hard enough to be trimmed with a bur or scalpel, and the excess can be snapped off in the mouth. Yet, Futar D is flexible enough not to shatter.

Futar D from Roydent: A revolution in hardness.

ROYDENT Dental Products
The Quality Solution

Futar D Occlusion is applied straight from the cartridge, onto the occlusal surfaces

- 30 second work time and 90 second set time = 2 minutes
- Final set hardness of Shore D 43
- Mousse-like qualities
- Trims easily with a scalpel or bur

Futar D Occlusion bite registration can be checked in the mouth by breaking off the excess material

Item Number	Description
K11932	Pink (2-50ml cartridges & 12 mix tips)
K11932B	Pink-Bulk (12-50ml cartridges, tips not included)
